

Settings players to work with your server by mouse and keyboard

Now, when your player is set to work with your display and audio system, you have to point it to your media source. **Attn:** If you purchased server and players from Perfect Home Theater this setting is done during setup and you don't have to do anything, just skip this part. If you purchased players from us separately, you have to point it to your media source. (">" = "go to")

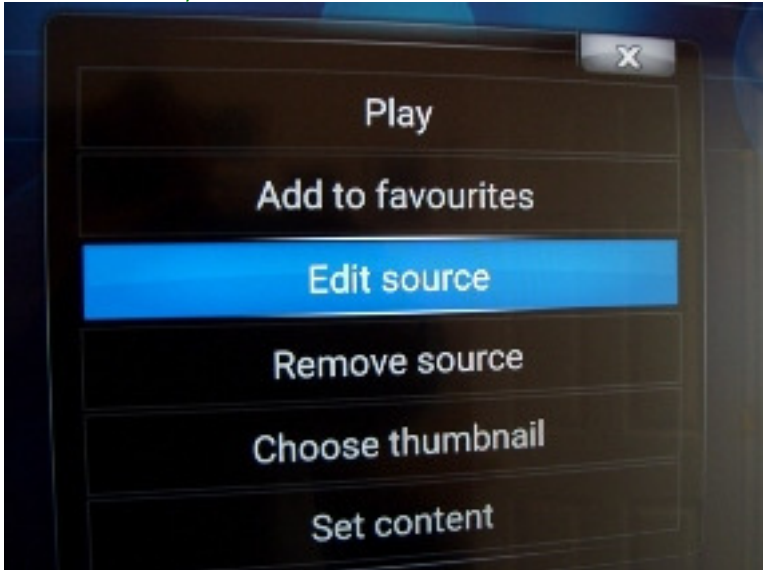

To set your server location on network: > Videos > Files

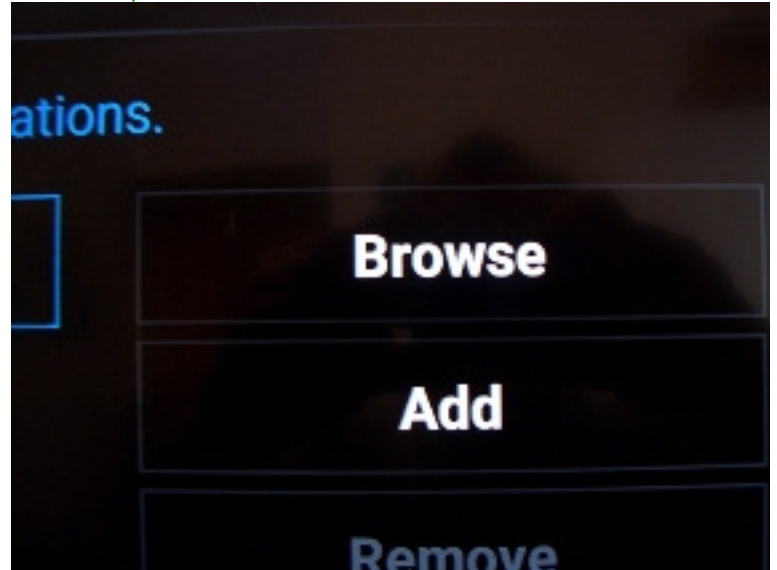

Right click on Videos >

> Edit source,

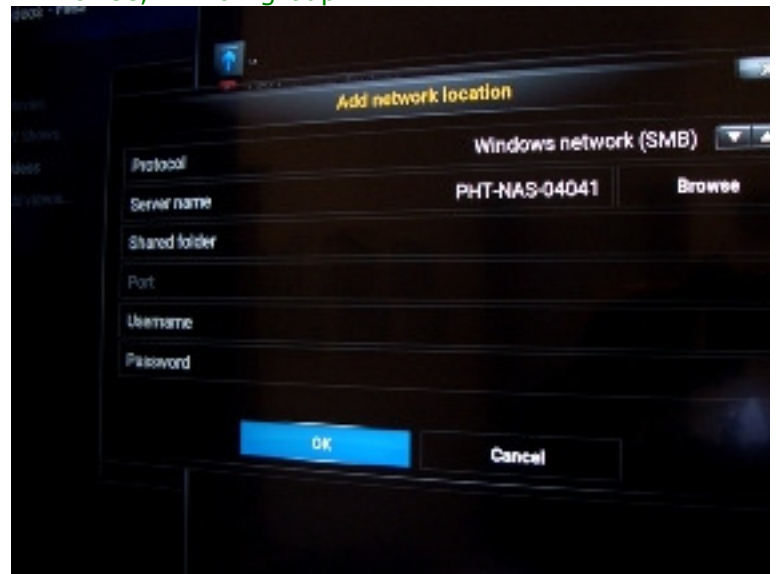

>Browse,

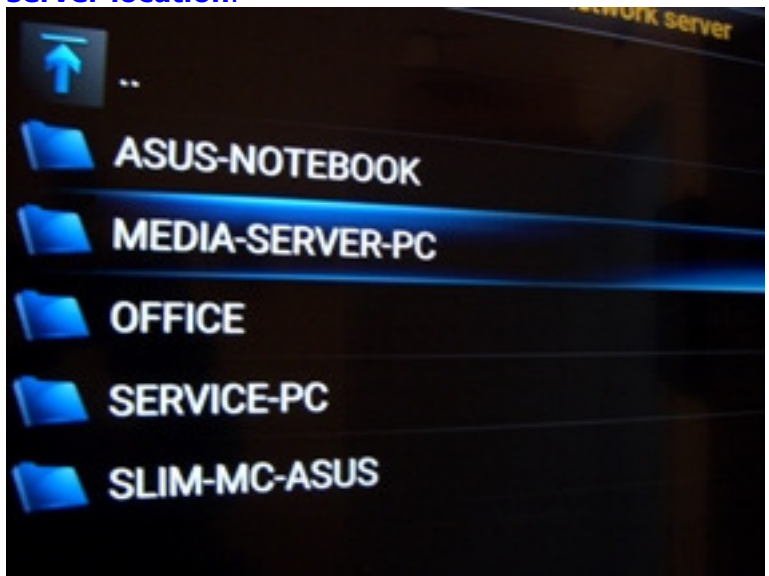

> Add network location,

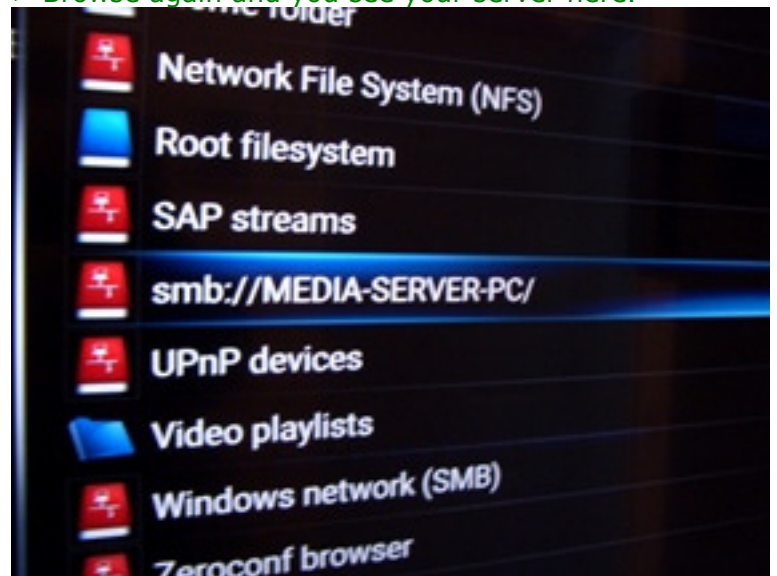

> Browse, > Workgroup

You see several computers, but > "your server name", OK on the right, OK on the bottom. **You set your server location.**

> Browse again and you see your server here.

1. To set your Video folder: Click on **smb:// "your server name"**, > Videos, OK on the right, OK on the bottom. Change current scraper to None (if different), OK on the bottom, Yes. **You set your Video folder.**
2. To set your Movie folder > Right click on Movies > Edit source, > Browse, > **smb:// "your server name"**, > Movies, OK on the right.
3. If you have more Movie folders on your server: > Add, (another line - "none" - has been created) > Browse, > **smb:// "your server name"**, > Movies *, OK on the right.

- 4.
5. If you have more folders repeat p3 If not:
6. OK on the bottom, Change current scraper to Movies if is not changed already, OK on the bottom, Yes. [You set your Movie folder\(s\)](#). > Home. You should see player updating Movie library.
7. To manually update library; open left TAB and click on "Update library"
8. Now you have to clean library from files we used to test your player, so: > System > Settings > Video > Library > Clean Library... > Yes.
9. > Home. You are ready to enjoy movies.
10. To set your Music folder > Music > Files, > Right click on Music > Edit source, > Browse, > **smb:// "your server name"**, > Music, OK on the right, OK on the bottom, Change current scraper to Music, OK, Yes. Now right click on Music > Scan Item to library, OK. [You set your Music folder](#). You should see player updating library
11. Now you have to clean library from files we used to test your player, so: > System > Settings > Music > Library > Clean Library... > Yes.
12. > Home. You are ready to enjoy music.
